Rural Agricultural work experience and Agro-Industrial Attachment Programme (RAWE & AIA)

A course entitled " Rural agricultural work experience and Agro-Industrial attachment programme " is run in the college of Agriculture for B.Sc.(Hons.)Ag.IV year students in the first semester to develop an understanding among students about rural life to acquaint them with different situations prevailing in the village with special reference to agriculture. This course has been instrumental in creating a huge impact in raising general awareness among farmers about novel methods and techniques used in farming at present. This course also helps students to get familiar with socio-economic situations prevailing in the village to provide an opportunity for practical training in crop production through work experience.

Different villages were selected for this purpose and allotted to groups comprising 5 to 6 students per village in different districts where students made survey of their allotted villages and made farmers aware about scientific cultivation , recent technologies, seed quality, advanced agricultural equipment, plant protection techniques, crop production, marketing of produce, importance of literacy and improvement in their living standard which proved highly beneficial in raising economic condition, literacy rate, social status, entrepreneurship and cultivation practices etc. of farmers.

Students were extensively demonstrated and trained in swachh programmes of actions under "Swachh Bharat Abhiyaan" . They were made sensitised on gender issues under "Beti Bachao Beti Badhao" . Awareness generation programmes for girls on sanitization , cleanliness and security issues for their all-round development. Vocational trainings and Skill development programmes in rural extension carried out for securing livelihood and made aware for improving life standard measures.

Details of Extension activities in the neighbourhood community in terms of impact on sanitizing to students to social issues and holistic development during the last five years

Impact of Extension Activities

For increasing farmers income 25 KrishiVigyanKendras under AcharyNarendraDev University Of Agriculture and Technoliogy ,Kumarganj , Ayodhya are working extensively by involving themselves in various extension activities. Variuos techniques adopted for reducing cost of production and increasing quality production is as follows : -

- The income of farmers has been increased through **Integrated Farming System**. Under this, farmers are being trained on the field by direct demonstration on their farms for increasing their practical knowledge. Along with this, animal husbandry, vegetable production, fish production, mushroom production, poultry, goatry training given which has helped in increasing farmer's income considerably.
- By making the method of **Crop Residue Management** accessible to the farmers, quality production is being increased by reducing the cost of agriculture by performing practical demonstrations among them on the fields. For this work, 7 KrishiVigyanKendras are working intensively. 18 KrishiVigyan Kendra are working through awareness, training and demonstration. The income of farmers will be increased by increasing the amount of biomass in the land while reducing the cost of agriculture.
- To double the income of farmers, 25 KrishiVigyanKendras have worked to double the income of 5000 farmers by adopting various aspects of agriculture.
- Farmers' income will be increased by providing advanced seeds and technology through **Front Line Demonstration** and **Cluster front line demonstration** of high yielding species on farmers' fields.

- Along with making the farmers aware about **organic and natural farming** for quality production, the income of the farmers will be increased by giving production technology, which the farmers will be able to sell in the market as an organic product.
- Agriculture Department, Animal Husbandry Department, Fisheries Department, Horticulture Department, Voluntary Organizations and Anganwadi employees are providing information about recent advance technology through KrishiVigyan Kendra. These employees are making continuous efforts in increasing the quality production as well as increasing the income of the farmers by making use of the technology available to the farmers of remote villages throughout the district.
- Farmers' income is being increased through KisanMela, KisanGoshthi, exhibition and publicity literature, and in the agriculture related programs organized by the state government in the district. The scientists are providing income augmentation techniques to the farmers.
- To increase the income of farming women, training and demonstration under the NARI Project (Nutrition Sensitive Agricultural Resources and Innovation), women and youths were trained by the technical scientists of KVKs. Various products through nutritional crop production, nutrition garden, fruit and vegetable preservation is being made available to farm women.
- Under Arya Project (Attracting Youth in Agriculture) unemployed rural youth, practical training is being given to the youths of Gorakhpur, Varanasi and Basti districts to establish themselves in self-employment villages. These youths will be able to help in increasing the income of farmers by adopting agriculture based employment.
- Farmers' income is being increased by providing scientific technology in the formation of Farmer Producer Organization. With the help of NABARD, formation of CBBO is in process in which each KrishiVigyan Kendra will be included.
- Every year farmers from different districts of the state come on educational tour to the university. And in the current year also, in view of Covid-19, 1425 farmers from the districts of Sitapur, Lakhimpurkhiri, Deoria, Kushinagar, SantKabirnagar, Ayodhya, Ghazipur, Ballia, Gonda etc. have taken technical knowhow for income augmentation from the university.
- The registration of the group of these farmers has been done by ATIC of Directorate of Extension. All such farmers are working as a source of inspiration for other farmers in their village to increase their income.
- Under Skill Training Programme 2000 farmers have been trained on dairy farming , poultry, goatry, mushroom production , fish and vegetable production, jaggery production techniques etc. for considerably improving the living standard of farmers by augmenting their farm income.

Metric No.	Description	Predetermined Weightage (Wi)	Peer Team Assigned Key Aspect Grade Point (KAGPi)	Key aspect –wise weighted grade point KAWGPI
3.6.4	Average percentage of students participated in extension activities listed in 3.6.3	12	4	48

3.6.4.1 Total Number of students participated in extension activities listed in 3.6.3 above year wise during the last five years
